
Smart Card Mini-driver Activator Build 64 Utorrent Windows

Category:Windows security software Category:Cryptographic hardware Category:Smart cards -3- No. 09-3655 Askins v. Holder The BIA acknowledged that Askins and his family were from Liberia, but stated that they had not demonstrated a clear probability that they would be persecuted based on their ethnicity if they returned to that country. The BIA also recognized that Liberia had a history of violent conflict between “a longtime rebel movement, the New Forces, and the Liberian government,” but stated that Askins and his family had not presented any evidence regarding the current conditions or likelihood of persecution. On appeal, Askins argues that there was substantial evidence for the IJ to find that his fear of persecution was well-founded. In support of this argument, Askins emphasizes the fact that he survived an attempt on his life by rebel forces and that his entire family has been subject to persecution in Liberia. The IJ found, however, that “the respondent ha[d] not provided any information in his affidavit to indicate that any one in the... country of Liberia is in danger of persecution based upon his ethnicity.” We find that the evidence presented by Askins was not sufficient to demonstrate a clear probability that he will be persecuted upon return to Liberia. As the IJ noted, the Country Reports for Liberia show that violence between the Liberian government and the New Forces rebels has continued since Askins’s departure. The 2002 and 2003 reports indicate that the conflict is a result of the former’s refusal to share power with the rebels and the former’s resistance to rebels’ rule. The BIA also recognized that Liberia had a “history of violent conflict between... a longtime rebel movement, the New Forces, and the Liberian government.” Askins has presented no evidence, however, that the New Forces would target him based on his ethnicity. We therefore
