Functional domains of the Escherichia coli DnaA protein. The Escherichia coli DnaA protein is required for initiation of DNA replication from the Escherichia coli chromosome at specific origins. We report here the results of a genetic analysis of a series of mutations in the dnaA gene that are hypersensitive for growth at elevated temperatures or that are temperature sensitive for growth. These mutations are allelic with those previously reported to be hypersensitive for growth at elevated temperatures and to cause DNA melting at low temperatures. We show that in these mutations, the amino acid changes do not alter the DNA-binding, transcriptional, or ATPase activity of the DnaA protein. However, the mutations affect the ability of the DnaA protein to interact with the Ocr-1 product in vitro and to stimulate DNA melting in vivo. The results show that the DnaA protein contains two domains: the "nucleoprotein" domain and the "ATPase" domain. The DNA-binding domain and the ATPase domain of the DnaA protein bind to each other. The DnaA protein binds as a dimer to a DnaA box and ATPase and as a tetramer to a DnaA box and nucleoprotein, respectively. A combination of the mutations in the nucleoprotein and ATPase domains of the DnaA protein abolishes all of the functions of the wild-type protein. These results suggest that all of the functions of the DnaA protein are a result of the interaction of the nucleoprotein and ATPase domains.. H. Nguyen, arXiv:1502.04663 [hep-ph]. R. Football Manager 2013 Patch 13.3.3 - 03/01/2013 Football Manager 2013 Patch 13.3.3 for PC If you have also played the Football Manager 2013 Alpha and Beta versions then you know that that the FMP runs so fast and smoothly on the PC that there is no need to install the beta version to play Football Manager 2013. Thanks to everyone for their support for the new Football Manager 2013! We are expecting an update coming soon but for those of you that have any problems please check out the following thread: Football Manager 2013 - Patch for Football Manager 2013 for PC - Released - New release. (Fm13) If there are any bugs with this version of FM13 be sure to post them here: Football Manager 2013 Patch v13.2 Download and Update | Servers | Community From the Football Manager Development Team This is a 13.3.0 patch for FM Football Manager 13. It does not include the first release of Sports Interactive's Beta version of FMP. If you have already installed this, you do not need to do so again with this patch. A major update is released today (Wednesday). If you have not yet downloaded the update you will be able to do so on Steam. If you have already installed the update then you will be notified to do so again if you have not yet installed the Beta version. If you do have the Beta version installed you will not be able to update. Here are the main updates in the patch, please keep a backup copy of your data so you can restore it in the event that something goes wrong with the update. SPORTING NEWS - NEW FEATURES - Achievements added - New match report screen - New menu system - New Football Manager Transfers Manager interface - New Player Stats screen - New Team Stats screen - New Club Websites screen - New Transfers screen with instructions and step by step process for the move - New feature to select which league to manage and also select to manage the whole world - New feature to select the country which is easiest to manage - New feature to set the difficulty of the game - Better Brazil transfer options - Sports Interactive have put a lot of effort into the region screen NEW IN-GAME FEATURES - New Players screen with 2d92ce491b
