A TIS 2000 software activation CD (TIS-2000 Software tis-2000-gm-software-free tis-2000-gm-software-free Mar 25, 2018 How to install the GM Tech2 software? Follow the instructions on the bottom of the page. If you need help, go to the Tech2 Software Support page. Press the "Install" button on the bottom left of the screen. Mar 25, 2018 Downloading & Installing the TIS2000 Software GM Tech2: - The process of installation is so simple and faster than the previous method.Q: SortedMultiset from Buckets.of I have code that produces a SortedMultiset: class SortedMultiset extends SortedSetMultiset { public SortedMultiset(Comparator comparator) { super(Buckets.of(comparator), comparator); } } where SortedSetMultiset is a method that returns a SortedSet. The returned Multiset is sorted based on the values of the Comparator. But in this case, I would like to sort it by the values of another field in the object. I created an overloaded method: @Override protected SortedMultiset subMultiset(T value, Comparator comparator) { SortedMultiset buckets = new SortedMultiset(comparator); Multiset multiset = buckets.toMultiset(); multiset.addAll(super.subMultiset(value, comparator)); return buckets; } and would like to know if it is a correct way to do this. The problem is that when I try to retrieve the entries using this method, I do not know how to cast a Multiset to a SortedMultiset. There is a method (Multis

Category:Computer-related introductions in 1991 Category:Manufacturing in SwedenCandidates joust over tradition October 16, 2001By Monica Hoefl RIDGEFIELD PARK, NJ — With the expectations of 1,000-plus football fans at the ready, a campaign began Friday night to decide who will take over the leadership of the Ridgefield Park Lions Club. The candidates for president, vice president and secretary are running on a platform of developing the club, said Maryanne Zajac, a member of the public relations committee that's organizing the event. The Lions Club in the hamlet of Ridgefield Park was founded in 1946 and was a point of pride for the town for many years, Zajac said. Zajac said there's more support than ever for the Lions Club, a feel-good organization that can do good for the town, and she thinks the Lions Club should continue to expand in Ridgefield Park. "We would be happy to have a larger membership, more events and become more involved in the community," she said. Two candidates are running for president, and seven are running for vice president. Also running are three for secretary. Both Zajac and the other public relations committee member, Priscilla Restifo, said the four-hour debate will begin at 7 p.m. at the Ridgefield Park Community Center. Restifo, a former president of the club, said the campaign has been very friendly and there has been no animosity between the candidates. "Everybody's done a good job, and we have a good balance in the committee," Restifo said. As a former committee member, Restifo said she would like to see the Lions Club be more involved in community events. "We need to reach out to the younger people and broaden the base," she said. Zajac said the committee had an opportunity to work with the city and was successful in revitalizing the town, which offers many events that cater to the community. A former president, Bob Prince, runs his own graphic design business in Ridgefield Park. Zajac said he has done many community projects for the Lions Club, and she thinks he would be a great candidate to lead the Lions Club. Zajac said it's important for the Lions Club to continue its connection with the community because the organization can do good for the people 2d92ce491b
