An easy-to-use tool that helps users to automatically edit the existing pictures. The software offers a set of different functions, including the following: changing the picture's name and attributes, as well as tweaking the different lighting conditions. The latter is done using the so-called Keymacro feature, where users can provide macros of their own for certain operations, such as changing the exposure, shutter speed, ISO, temperature, and white balance. In addition, the plugin supports its own set of functions, including the capability to change the picture's perspective, cropping it, changing the exposure, saturation, contrast, contrast, brightness, and so on. Lastly, users can apply the main effects, including the ones that deal with details, sharpness, blur, and vignette. The plugin also supports Lightroom 3 and up, and is thus accessible for users who have not yet upgraded to the latest version. It can also export to several different formats, including the ones that support Lightroom's latest version. Keymacro 3.0 Description: A comprehensive set of features for users to help them edit their pictures easily. This tool is designed to allow users to change the picture's name, attributes, and any other attribute. It can also handle different lighting conditions, adjusting the color, contrast, and so on. It also allows users to set the picture's exposure, contrast, brightness, white balance, and many other operations. In addition, the plugin supports its own set

of functions, including the ability to change the picture's perspective, crop it, rotate it, and resize it. The program can also apply several effects, including ones that deal with blur, sharpness, contrast, exposure, highlight, shadow, and details. Lastly, it supports the output of Lightroom up to version 4 and is thus accessible for users who have not yet upgraded. The plugin can also export pictures to several different formats, including the ones that support Lightroom's latest version. Keymacro 5.0 Description: An easy-to-use tool that helps users to automatically edit the existing pictures. The software offers a set of different functions, including the following: changing the picture's name and attributes, as well as tweaking the different lighting conditions. The latter is done using the so-called Keymacro feature, where users can provide macros of their own for certain operations, such as changing the exposure, shutter speed, ISO,
