This course explores the concept of academic integrity and ethics by focusing on Internet use in academic settings, addressing issues of privacy, confidentiality, plagiarism, and research misconduct. Students will study the content of the UC's Academic Integrity and Ethics, a practice guide that defines standards of honesty and integrity in the classroom. The students will also learn how to use an Internet toolkit to analyze websites and web pages. The Internet toolkit will teach the students how to search the Internet for online information and how to protect their own work. Finally, students will explore ways to use the Internet safely, effectively, and responsibly. Mastering the Microsoft Office Suite Themes, Themes, and more... Description: This course covers the key ideas of using the Microsoft Office Suite, by identifying the different themes that you can apply to your documents and presentations. These themes will help you with formatting, layouts, page setups, and more. The course also details how to apply your own photos and backgrounds to your documents. By the end of the course, you will know how to apply a theme in Microsoft Office. Graphics Arts and Animations with Adobe Illustrator Description: With Illustrator, this course covers the art of designing illustrations, graphics, cartoons, typography, and more. You will learn how to create several kinds of different illustrations, including typography, icons, lineart, and more. By the end of the course, you will be able to create memorable graphics. Make Your Web Site Shine With HTML5 and CSS3! Description: HTML5 is the modern version of the hypertext markup language, and this course discusses its use to enhance your web site or webpage. You will learn how to create and customize the navigation of your website, and how to add and use the tags to your benefit. You will also learn how to create and edit the menu, navigation, and links that will help visitors navigate your site. Finally, you will learn how to add special codes that make your site more beautiful and more effective. Social Media Marketing & User Engagement Description: This course will teach you how to use social media to connect with people and create a positive image for your business. You will learn how to create and manage social media accounts, increase followers and fans, use analytics, and more. By the end of this course, you will know how to develop a marketing plan that will help you generate traffic to your site. Create Professional Design with Adobe Photoshop Description: This course gives you the knowledge and skills necessary to create
