SHUT DOWN PLANNER

* A timer that lets you customize a delay time after which your computer will automatically turn off. In addition to that, you can control whether the computer will shutdown completely or shut down gracefully. * Minimalistic yet stylish interface. * Able to use on your personal computer without changes to the registry. * Save all data while using the ShutdownPlanner.com free software. * The timer can be configured by entering the number of minutes you want to wait before the PC shuts down. The free ShutdownPlanner.com tool will close without saving any data if it detects a "crash". In such a case, you will be asked if you want to save the data on an external drive (you can choose to do so or not).
