Webmasters struggling with site speed issues and realizing they should speed up their sites can use this tool to analyze and improve the loading time and page rendering speed of their sites. Besides the feature that enables you to view the page file size, "Problem Report" button allows you to submit a site report to the webmasters with speed issues. If you want to optimize your site at an additional speed, this software allows you to change the properties of HTML files. You can make the format, rendering or even compression of the HTML files faster. You can run all the analysis and optimization functions in one place. Furthermore, you can improve the performance of your website by means of website optimization. For this purpose, the program enables you to create an XML file from the report and upload it to the webmasters. In the newest version, the software supports more than 60 web browsers. You also have the possibility to analyze the items that can be optimized on a single page. In addition, this application analyzes how the items used on a website perform and which ones need improvement. So, it can provide you with detailed recommendations for your website or even for your clients. Key Features Of WebSiteOptimizer Pro: Recover From DNS Conflict: You can be sure that your website will work properly when you use a real DNS server. However, your DNS server may be in the domain of a large organization and you may not be able to change the settings. If you have previously experienced the DNS problems in the web page or lost visitors because of this issue, you can use this software to fix these problems and be sure that your website will work properly. Create A New Website: If you want to speed up your website, you can create a new site and host it at a free hosting server. You can then configure the new site and make it look similar to your current site. You can perform all the steps of website creation as if the new site will look the same like your current site. Speed Up Connections: You can add the FreeDNS entry to your computer so that it can use the server located in the IP address you have chosen. In this way, you will be able to use the same connection for browsing the web, playing online games or downloading files that you want to use on your website. Speed Up Web Pages: When you want to optimize your web pages, you should use the tools that will make your web pages load faster.

You can use this application in order to convert various media files to your smartphone or tablet. Features: -Batch conversion function -Converts various types of media formats such as AVI, MOV, MP4, MPEG, MP3, WAV or 3GP. -Works on all operating systems such as Windows, Mac OS or Linux. -Supports lossless or lossy conversion -Compatible with iPod, iPad or iPhone -Manually optimize settings -Multiple profiles available (resolution, bit rate, aspect ratio and encoder) -Automatically optimized settings -Support resizing -HD outputs available -Hardware acceleration -Fully compatible with Mac OS and Windows -Batch processing with one click -Supported formats: AVI, MOV, MP4, MPEG, MP3, WAV or 3GP Supported video formats: HDV, H.264, H.265, VC-1, MKV, TS, TMV, AVI, AVI M2TS, AVI WMV, FLV, 3GP, MP4, TS, TS WMV, RM, RMVB, IMA, 3G2, DVRD, DVR, RTMP, MTS Supported audio formats: MP3, AAC, AC3, M4A, FLAC, AAC+ Supported subtitles formats: SRT, SRT Supported extensions: MXF Compatibility: Windows, Mac OS or Linux Advantages: -Fully compatible with iPod, iPad or iPhone -Batch conversion, more efficient processing -Support lossless or lossy conversion -Multiple profiles available (resolution, bit rate, aspect ratio and encoder) -Manually optimize settings -Automatically optimized settings -Support resizing -HD outputs available -Hardware acceleration -Fully compatible with Mac OS and Windows -Batch processing with one click -Supported formats: AVI, MOV, MP4, MPEG, MP3, WAV or 3GP Supported video formats: HDV, H.264, H.265, VC-1, MKV, TS, TMV, AVI, AVI M2TS, AVI WMV, FLV, 3GP, MP4, TS, TS WMV, RM, RMVB, IMA, 3G2, DVRD, DVR, RTMP, M 09e8f5149f

What's New In Apple Video Converter Factory?

- Create your own profile for any media file
- Support multiple device profiles
- Convert videos to AVI, MOV, MP4, MPEG or MP3 in various qualities
- Create video with ease from iPhone, iPad, iPod or your Mac
- Support video conversion from YouTube or from device's camera
- Optimize output file settings before conversion
- Support to change video file's Aspect Ratio
- Load you files from file manager
- Export video files to Video 2000 Mac
- Optimize video image
- Adjust video player
- Support to create QuickTime movie from multiple files
- Export videos in 3GP, MP4, MOV, MP3, AAC and more
- Set video bit rate for more video quality
- Support for batch conversion of videos
- Load and convert Multiple videos simultaneously.
- Convert video to iPhone/iPad/iPod
- Convert video to iPhone/iPad/iPod with watermarks
- One software to do all!
- Optimize video for iPhone/iPad/iPod
- Convert video to iPhone/iPad/iPod with subtitles
- Create videos from iPod/iPhone/iPad/iPod Touch with audio for iPhone/iPad/iPod
- Create video with iPhone/iPad/iPod Touch
- Create video from iTunes
- Create iPhone videos
- Create videos from phone's camera
- Create videos from iTunes with photos
- Do multi-conversion job
- Preview videos before conversion
- Play videos through iPod/iPhone/iPad/iPod Touch/iPhone/iPad/iPod touch
