Powered by Uploaded: 11-16-2007 12:46 AM Downloads: Online Help: Language: English File size: 55.36 MB Publisher: Penstate Software License: Freeware Version: 2.1 System Requirements: Windows 95/98/Me/2000/XP/Vista (32/64-bit) Program Requirements: Permissions: Shareware Child Lock is a program primarily designed for parents who want to limit the access of their children to the computer. It comes packed with simple options for disabling keyboard and mouse controls. The installation procedure is rapid and does not require special attention from the user. Once it is run, Child Lock creates an icon in the system tray area, from where you can bring up a small panel to perform actions. You can set the computer to automatically lock when it is in idle state, thus blocking keyboard and mouse commands to children. It is also possible to block only the Windows key, allow only a few keys

(Space, PageUp, PageDown), or lock everything until a special key combination is typed (Alt + Home or Alt + End). They can be viewed in the Options panel. Command-line operations are supported, and you can view their syntax in the Help area. There are no other options provided by this utility. For example, you cannot schedule auto-locking. Child Lock does not put a strain on computer performance, since it runs on a very low quantity of CPU and memory. It has a good response time and does not cause the operating system to hang, crash or display error notifications. We have not come across any issues in our tests. Although some improvements are welcomed in the visual department of the interface, Child Lock offers a simple solution for all parents who want to restrict their children's access to the computer. Child Lock Features: Reverse that functionality, I want to be able to set it to only not allow access to the task bar (not menus) and the Home button. Posted 04/09/2012 BIGGER

A macro application for controlling keyboard and mouse input in Windows. It is also possible to lock the computer automatically (auto-lock) or only allow certain keyboard and mouse commands. KeyMacro Review: There are two big differences between the paid version of KeyMacro and its free version: paid KeyMacro offers the following features: - supports hardware mouse buttons - supports hardware keyboard LEDs (like the Ctrl and Alt keys) - many more keyboard macros (different keyboards and custom mappings) - integrated help and documentation KeyMacro comes with the following modules: KeyMacro Player: The "easy to use" section. KeyMacro Settings: The settings for the application. KeyMacro Help: The keyboard and mouse help section. KeyMacro Docs: The user manual of the software. As you can see there is no difference between the two versions. If you want to try KeyMacro free, you just need to download it from

the download area of the main page. Then you can open the executable file (exe). You will be asked for your password and the keys in your computer. Once the installation is complete you will be able to use KeyMacro. KeyMacro is an application for controlling the keyboard and mouse in Windows. It can be used to automate repetitive tasks such as entering passwords or other text, or to control games or applications. The program works in all versions of Windows, and can also be used to control hardware devices such as mice, joysticks and webcams. KeyMacro comes with many of the features of other software applications such as Dreamweaver or Photoshop. You can also customize the keyboard shortcuts in the program. The installation is simple, and there is a nice Help screen to assist you. However, it is only present in the registered version. KeyMacro comes with the following tools: KeyMacro Player: The "easy to use" section. KeyMacro Settings: The settings for the application. KeyMacro Help: The keyboard and mouse help section. KeyMacro Docs: The user

manual of the software. As you can see there is no difference between the two versions. If you want to try KeyMacro free you just need to download it from the download area of the main page. Then you can open the executable file (exe). You will be asked for your password and the keys in your computer. 1d6a3396d6

How to Block your Keyboard and Mouse: This guide will teach you how to lock your keyboard and mouse in order to allow children to work on your PC.
