### **What's New in the iTunes Reader?**

iTunes Recovery is designed to help you recover all your precious media (photos, videos, music) that have been backed up to your iPhone, iPod touch or iPad device. iTunes Recovery is a well-known app for iOS devices, such as iPhone and iPad. It is extremely easy to use and can even recover the lost media files for you. It can help you recover songs, videos, contacts, photos, notes, and other files that you have lost from your device. How to Recover Lost and Deleted Items on iPhone or iPad Connect your iPhone or iPad to the computer using USB cable. Launch iTunes on the computer. Connect the device to iTunes and wait until it is listed in the left panel. If your iPhone or iPad is selected in the left panel, go to the Options menu and select the option to “Restore from iTunes Backup”. Select the media file(s) you want to recover from the list. Press the OK button to start recovering the files. To preview the media files, go to the Music or Videos section of the left panel. To view the contacts, go to the Contacts section of the left panel. After iTunes has finished recovering, press the OK button to confirm. Note: In order to recover the lost media files on iPhone, you need to use iTunes to back up the lost media files. Please carefully read the safety guidelines before using it. ※ Due to differences in operating system versions, features and functions, prices are subject to change without prior notice.
