RTP RSS Feed Crack + Full Version Free

- Provides a method of importing your own RSS feed to the site. The RSS feeds are then processed by a RSS feed processor which produces your own RTP RSS feed that can be added to the site as a RSS feed module. - The RSS processor used by the RTP RSS module will strip out references to modules, dates, times etc and put the values into the RSS feed itself. The module does provide a way of editing the results to ensure this does not happen. - For example if you were importing a RSS feed generated by a module called XYZ the system might appear as: - The RSS feed module knows how to parse the URLs with module names. If any module used in the rss feed has a module action for Edit then it will use the edit page to edit the feed rather than the default Edit URL generated by the module. - The module also allows you to specify a Link. This can be a template to use for all feeds, or a template that only takes that parameter into account. If you don't specify a link it will use a generic link. - The following properties can be used to configure the feed: - Feed Title - Title of the feed - Description - Description of the feed - Title - Checkbox indicating Title should be included in feed - Description - Checkbox indicating Description should be included in feed - Link - Checkbox indicating Link should be included in feed - Creator - Checkbox indicating Creator date should be included in feed - Category - Checkbox indicating Category date should be included in feed - ImageURL - Checkbox indicating Image URL date should be included in feed. The module supports Height and Width as optional attributes - SQL Query - The query to be run. This can only be edited by Host. It must output columns with the names in line with the ticked items above - Enable Security - Enforces security of the RSS feed, so only module viewers may see the feed - No Permissions Text - The text displayed in the feed when the user does have permission to view the module - Convert time to UTC - Corrects time to UTC - Required since some RSS readers (e.g. RSS Grafitti on Facebook) do not correctly interpret the time in the RSS Feed - UTM Source - To support Google Analytics Source tag. This

RTP RSS Feed Torrent Download For Windows [2022-Latest]

- The content of this module displays the title, description, feed URL, publish date, creator, category and image of the feed at the same time. The module also has the option to convert the feed time to GMT. The module also supports Google Analytics which outputs the code for the medium and source tags at the end of the feed. To output the Google Analytics, enable the Enable Google Analytics checkbox. This module is used to generate the following RSS feeds: - Newsfeed (item.NodeName="Newsfeed") - Homefeed (item.NodeName="Homefeed") - Recentfeed (item.NodeName="Recentfeed") - Eventsfeed (item.NodeName="Eventsfeed") - Profilefeed (item.NodeName="Profilefeed") - Sitefeed (item.NodeName="Sitefeed") - Contactfeed (item.NodeName="Contactfeed") - Contactsearchfeed (item.NodeName="Contactsearchfeed") - RTP Newsfeed - Newsfeed (item.NodeName="Newsfeed") - Homefeed (item.NodeName="Homefeed") - Recentfeed (item.NodeName="Recentfeed") - Eventsfeed (item.NodeName="Eventsfeed") - Profilefeed (item.NodeName="Profilefeed") - Sitefeed (item.NodeName="Sitefeed") - Contactfeed (item.NodeName="Contactfeed") - Contactsearchfeed (item.NodeName="Contactsearchfeed") - RTP Homefeed - Homefeed (item.NodeName="Homefeed") - Recentfeed (item.NodeName="Recentfeed") - Eventsfeed (item.NodeName="Eventsfeed") - Profilefeed (item.NodeName="Profilefeed") - Sitefeed (item.NodeName="Sitefeed") - Contactfeed (item.NodeName="Contactfeed") - Contactsearchfeed (item.NodeName="Contactsearchfeed") - RTP Eventsfeed - Eventsfeed (item.NodeName="Eventsfeed") - Profilefeed (item.NodeName="Profilefeed") - Sitefeed (item.NodeName="Sitefeed") - Contactfeed (item.NodeName="Contactfeed") - Contactsearchfeed (item.NodeName="Contactsearchfeed") - RTP Profilefeed - Profilefeed (item.NodeName="Profilefeed") - Sitefeed (item.NodeName 09e8f5149f

RTP RSS Feed [Win/Mac]

The RTP RSS Feed is a module that generates an RSS feed from a SQL query defined by the module settings. It is very easy to setup and configure in the module settings. Simply tick the boxes you want and enter the required query. The RSS feed is configured using the module settings. The fields are explained below: Field Name • Description – The feed description • Title – The feed title • Link – The feed link • Author – The feed author • PubDate – The publication date • Creator – The feed creator • Category – The feed category • Image – The image for the RSS feed • ImageUrl – The image URL for the RSS feed • No Permissions Text – The text that appears on the RSS feed when the user does not have permission to view the module • Support Security – Enforces security of the RSS feed, so only module viewers may see the feed • SQL Query – The SQL query to be run. • UTM Source – The UTM Source value – Optional • UTM Medium – The UTM Medium value – Optional • Convert Time to UTC – Corrects time to UTC All fields are required unless the are indicated above with an asterisk. To output the RSS feed to you can either simply paste the SQL query in the module settings, or you can define the SQL query in the module settings and then simply use the module settings to define the file location and name of the file that will be created. The module will then generate an RSS feed for that file with the name you specified. You can define multiple RSS feeds by duplicating the settings and placing the file location and file name in place of the SQL query. RTP RSS Feed Workflow: To use this module first open the module settings, set the settings and start the module. You can then configure the SQL query if required and specify the file location and name that will be used to generate the RSS feed. Below is a screenshot of the module settings. We have ticked the Title and Description fields and entered the following SQL query to generate the RSS feed: SELECT TOP 10 [dbo].[tvalues].[val_id] AS [val_id], [dbo].[tvalues].[val_name] AS [val_name], [dbo].[tvalues].[val_description] AS [val_description], [dbo].[tvalues].[val_category] AS

What's New in the RTP RSS Feed?

The RTP RSS Feed module allows you to create a RSS feed in your DotNetNuke website. You can select how users and module viewers can view it. Users can view the RSS feed in their browser if they have the RSS Reader installed or in the RSS Feed module. If the module is disabled users will still be able to view the RSS feed but they will not be able to subscribe to it. Module viewers will also see the name of the module that the feed is generated from and the title of the item. Module Viewers: - Display the RSS feed - Check box that when ticked will show the feed as a regular block item - Check box to enable RSS feed auto-play on mouse over - Check box to enable RSS feed on user page load - Check box to show published date on feed - Check box to show creator date on feed - Check box to enable the title in the feed User Users: - View the RSS feed - Check box that when ticked will show the feed as a regular block item - Check box to enable RSS feed auto-play on mouse over - Check box to enable RSS feed on user page load - Check box to show published date on feed - Check box to show creator date on feed - Check box to enable the title in the feed - Required to show the page title as the first line of the feed Additional Features: - Compatible with any custom feed link that is on the page - Compatible with Fast-RSS plugin to display new posts in the feed - Compatible with RSS Feed Default Module that offers a 'View' or 'Edit' link - Compatibility with RSS Feed Module Default Module that offers a 'View' or 'Edit' link - Ability to edit the SQL query used to generate the feed - Ability to preview the SQL query used to generate the feed - Ability to test the module via a custom module page - Ability to setup and test the feed on the "Test Settings" page Installation and Configuration: 1. Install the RTP RSS Feed module by following the installation guide in your DNN Help. 2. Optionally, install a Fast-RSS plugin. If you are not using Fast-RSS, then you do not need to install the plugin. 3. Navigate to the path C:\Program Files\SiteName\Help\Manage\RTP RSS Feed in the portal. 4. Run the setup script.exe 5. Once the module has been configured
