### **Dragonfly File Sorter (formerly Peacock File Sorter) Crack X64 [2022-Latest]**

Dragonfly File Sorter is an easy-to-use program that automates many common document management tasks. With Dragonfly File Sorter you can move, copy, copy as a link, copy as a resource, rename, delete, compress and more. Dragonfly File Sorter includes a web-based file viewer and size calculator, which is used for quickly measuring the size of various items in your document. Dragonfly File Sorter supports nearly all popular file formats (including Microsoft Word and Excel documents, and images such as JPEG, GIF, TIF, PNG, etc.) and can be used to manage any kind of data, including text documents, images, MP3s, PDFs, web pages, office documents, and much more. Dragonfly File Sorter allows users to organize files and folders in a number of ways. The program includes an easy-to-use interface with a spreadsheet-like view. This view allows you to add one or more files or folders to your list, and to organize them within two groups (one for Recently Added Files, and the other for Organized Files), along with columns for Date Created, Date Modified, Size, and Type (file extension, file name, or folder). One of the more unique features of Dragonfly File Sorter is the ability to name folders. You can name folders according to the type of file (like Music, or Images, or Documents), and also name them according to the name of the file (like File.doc or File(2).doc). Within the Organized Files group, you can also name folders according to criteria that you define (for example, Start With A, File Size, or Date Modified). You can also let Dragonfly File Sorter decide which files and folders to organize based upon the following rules: A file's name suffix determines whether it should be placed into the Recently Added or Organized Files folders. You can also decide to ignore file names. A file's size determines whether it should be placed into the Recently Added or Organized Files folders. You can also decide to ignore file sizes. A file's extension determines whether it should be placed into the Recently Added or Organized Files folders. You can also decide to ignore file extensions. A file's type determines whether it should be placed into the Recently Added or Organized Files folders. You can also decide to ignore file types. A file's date modified determines whether it should be placed

### What's New in the?

Dragonfly File Sorter is a file sorter that will allow you to easily organize your downloads into groups (folders) based upon criteria you set when downloading files. It is a powerful file sorter that will store multiple directory structure settings - including changing the path of where the file is moved and renamed to, and then optionally also place the file under a 'label name' - allowing you to keep the underlying file name but give it a unique name as it is stored on your hard drive. Instantly create and manage custom folders or create predefined folder structures (Each folder structure will be named after the folder it is created in). Multiple ways to manage your files including move, rename, delete, etc. Password protected folders. Tabs to quickly create and manage folders at a quicker pace. Many built in folder settings to give you full control of what is placed where. Allow users to enter and save custom folder names. Allows you to batch move/rename your files (including SFTP) with multiple files in a single action. When exporting files, You can optionally filter the settings using the 'Filter' tab for each file type in the 'File Options' section. (In the example, I'm only sorting files from a sub-folder of the root using a custom folder name (Blah / Addons)). Due to the nature of it's use, the files will be fairly small in size for the quality of the program.
