After visiting a VR demo I was impressed that I wasn't feeling ill, that I could read a book without distraction, that I could hear conversations without being physically present, that I could have a cup of coffee without getting physically drunk, and that I could enjoy 2D movies with the same kind of immersion as I have with 3D films. The technology is a great idea, but needs a lot more work. Oculus Rift 2015-04-21 More immersive than television. This is what I've been looking for to replace my TV. This is a social, spatial, immersive experience that really takes the viewer into a world all of their own. Not to mention the capability of the PC and the 360 degree view makes movies and games even more engaging. I can see this becoming the next generation of TV. Oculus Rift 2015-04-21 This is a must have product for the people who are interested in VR. There are many interesting VR apps available for the Oculus Rift, such as games and other applications, but one that we recommend for those who are really into VR is "The Climb", a real-time virtual reality game developed by Stanford University. The Climb is developed as a three-dimensional climbing simulator that places you at the bottom of a mountain. To get out of the mountain, you must climb up the mountain using virtual ropes. You can get more information about the game at the official website. "The Climb" is the best VR app that has ever been released!
