It helps individuals choose from within a Windows-based OS the next system they'd like to boot into after restarting the machine. It does this with the help of the EFI bootnext Free Download option. The application itself is made up of a simple system tray menu, with the possible choices picked up right from your boot menu. There is no interface to this app. In fact, it would better be characterized as a tool. It offers functionality to those who have an idea about dual-boot systems, multiple OS PC utilization. In fact, it helps individuals who are trying to dual boot Linux-based systems with Windows. It becomes more difficult to manage such an arrangement because of the adjustments that need to be made to the boot sector. Two different versions of Windows are going to be much easier to manage, from this perspective, at least. bootnext is an application that will probably help only a handful of people. Why? Simply because dual booting is more of an experimental side of computing, for those interested in testing multiple operating systems, for those wanting to understand boot sequences, and so on. Also, keep in mind that if you'd like to create a scheduled task for this particular app, you can either use the provided MSI file or add the app yourself using the EXE variant and a Windows OS Task Scheduler. Uninstalling the app will also remove the created task.

Illegal immigrant Ilias Maglethas was hired by the U.S. Census Bureau, despite an immigration official's determination that he was not in the country legally. U.S. officials discovered that the 27-year-old Canadian entered the country illegally after the Census Bureau hired him in November 2013 to conduct field work in Philadelphia and New Jersey, the New York Post reported. Maglethas was hired despite a memo from David C. Aguilar, a consular officer from the Canadian Department of Foreign Affairs and International Trade. Maglethas told the Post that he didn't want to sign the document because he didn't understand the document in English. The Post reported that Maglethas has a pending deportation order, but has been allowed to stay in the country because he is the son of an American citizen. In his Facebook post, Aguilar wrote, "The measures that are being taken to target and apprehend undocumented aliens, including members of the military and law enforcement, appears to be an over-reaction to these types of issues.

The upper aerodigestive tract has a very high incidence of neoplasms and their incidence increases with age. Nasal and paranasal tumours are the third most common tumours in the head and neck. Rhinosinusitis is caused by a combination of inflammatory, infectious and neoplastic disorders, which manifests clinically with or without nasal obstruction. Chronic rhinosinusitis in general is a chronic inflammatory disease of the paranasal sinuses, with a predilection for the maxillary sinus. The disease is generally nonspecific and unresponsive to therapy. The mainstay of treatment for chronic rhinosinusitis is medical therapy. Frequent exacerbations of chronic rhinosinusitis may call for endoscopic sinus surgery. Treatment of the mucosal lining of the sinuses through open or endoscopic surgery to eradicate the pathologic mucosa and to relieve the symptoms of congestion, nasal discharge and rhinorrhea.
