
OsenXPSuite 2010 Enterprise Edition Free Download

OsenXPSuite 2010 Enterprise Edition consists of Visual Styles, ActiveX controls, Scripts and User Interface Events Visual Styles: OsenXPSuite 2010 supports 40+ visual styles. With the style you can customize your form, buttons, text boxes, labels, pictures and other UI elements in your form, which includes 20+ styles and all available gradient and 3D effects styles. By using visual styles, users can get a unique and professional look to their applications and allow you to simply integrate this visual look and feel into your application without any additional coding. ActiveX Controls: OsenXPSuite 2010 offers a total of 24 new ActiveX controls that extend the capacity of the control set significantly and increases the ease-of-use of your controls. With 24 new ActiveX controls you can directly use the controls in your .NET projects without requiring prior experience with OsenXPSuite. User Interface Events: OsenXPSuite 2010 offers a total of 5 rich features that increase your application's usability and user experience and includes following events: Mouse Wheel, Pause/Resume, double click, menu hot item, click, focus, text change, text drop, text get, text enable, text disable, combo box, split buttons, buttons, label and checkbox. Scripts: OsenXPSuite 2010 includes 17 new scripts that allow you to use the built-in script commands with the application directly without the need to hardcode them into your application. Scripts can perform the following tasks: - Create special effects when click, double-click, mouse wheel, menu hot item, text change, text drop, text get, text enable, text disable, combo box, split buttons, buttons, label and checkbox. - Switch between 3D effects and 2D effects. - Generate random strings. - Perform a function that only activates when the mouse cursor hovers over a button. - Perform a function that only activates when the mouse cursor hovers over a text box. - Perform a function that activates when the mouse cursor hovers over a shape. - Perform a function that activates when the mouse cursor hovers over a picture. - Perform a function that

What's New in the?

OsenXPSuite 2010 is versatile, powerful, and easy-to-use and customizes to give you the ability to quickly create professional applications that have the latest visual styles and advanced features that are seen in such products as Microsoft® Windows XP, regardless of their operating system. It consists of a total of 24 controls which each brings a revolutionary fresh new look and rich features to your applications. Novice programmers can use OsenXPSuite 2010 to create a fully functional database browser just writing a single line of code. Professional developers can use the OsenXPSuite 2010 control's many properties, methods and events to create sophisticated and user-friendly database or non-database front-end applications. For over 7 years OsenXPSuite is helping developers like you create sleek professional user interfaces with unparalleled ease. These and many other unique and "developer-friendly" features make OsenXPSuite 2010 the absolute essential tool for user interface development and has been prepared for cutting your development time drastically. By that reason, I invite you to download the fully functional free trial version of the activex control and start integrating OsenXPSuite 2010 controls into one of your existing programs right away. License: OsenXPSuite 2010 is distributed under the GPL license. It's free to use and redistribute. You may download and run the trial version with no cost at all.
