Serial number maplogic layout manager Qusetion: We are releasing a new version of VMware PC-ESXES (VMware ESX Server). I'm wondering how to test the new version of VMware PC-ESXES. A: Your question is about VMware ESX server 4.1.0 Patch Release 4 which was released on 28th of September. This has not been a minor update, but a new product version. If you want to use the newest version you need to request for support or connect to a support group with a update. The PC-ESXCS has added a new section to the VMware Web site called VMware Technical Articles where there is a VMware ESX 4.1.0 Known Issues list and it is interesting reading. Q: How to get Intel HD graphics 5500 to work on ubuntu 16.04? I have intel hd graphics 5500 on my computer. When i try to install nvidia graphics, i get kernel panic and black screen. how do i get ubuntu to work with this card. Here is a screenshot of where i start installation and the error i get. A: To get the latest Intel drivers to work, you must install the daily build of Ubuntu 16.04 (assuming you already have updated to the current Ubuntu 16.04 version), download the latest "intel-linux-graphics-installer". When doing so, you will need to reboot your computer to the GRUB menu, to resume from it (if you were at the GRUB menu during the process) or go directly to recovery mode. Then you must select "reboot and install". Note that the Intel graphics installer is not an official Ubuntu project - you do not get support for installing the graphics driver from the official Ubuntu project as you would by installing the latest version of Ubuntu. Hence
