A few years ago, every day I would put my best foot forward for my first Photoshop project and was lucky if I had a foot. I thought a lot about how a watercolor painting looked on a print, the way different light made an all-white wall look dirty, and how a shot taken in a natural light turned out with a poor exposure. Photoshop helped a lot to discover, structure and add a high level of customization in my photo editing work. Many photographers were already using Photoshop for their work, but I joined the new wave of people that were catching up with this amazing piece of software and soon I was drowning in questions about all its features and uses. Although I am currently working with Photoshop, I started my study with Photoshop Elements. I hope my struggles will help you go through all those necessary steps before becoming a master in Photoshop. I am sure that everyone has a different process, but you can get there with a good study and practice. Today, Photoshop is the standard for graphic design, creative art, and web design. Photoshop allows you to work in layers. In the following, each file is composed of a single layer. You can insert, select or delete layers to change the image at different levels. Open a file As an image editor or web designer, you will often use Photoshop for a first test. It is much more user friendly and easier to use than MS Paint. You can open a file with Photoshop using the New dialog box. New dialog box If you are opening a document that you have saved in the default format, it will open in Photoshop. If you want to open a particular file that you saved on a computer or an external device, you can load the file with the “Open” dialog box. Open dialog box Choose the file you want to open and click on the “Open” button. Basic operation The icon on the toolbar, which looks like a folder, allows you to navigate through your current opened files. The central button on the toolbar is the “Open” button, which opens the file you choose in your current work area. You can also access your files and folders in the drop-down menu
