In this tutorial, we will show you how to use the Alleycode HTML Editor to create a template for your pages. If you want to learn more about Templates and how to use them, check out this tutorial: Install Alleycode HTML Editor Alleycode HTML Editor can be downloaded from the File section of their site: Important note: If you choose to download the trial version of the software, you will not be able to continue using the application after the end of the trial period (30 days). Step 1 Go to the File section of Alleycode's website, click on the Downloads tab and download the latest version of the software. Step 2 Close all the programs that you have running, and unzip the downloaded archive. This will unpack Alleycode HTML Editor into the directory you have chosen. Step 3 Start the program by double-clicking on the Alleycode HTML Editor icon that you have just unzipped in the previous step. Step 4 Choose a template from the "Templates" tab. For this tutorial, we have created a simple template for the "Laravel" application. Step 5 Click on the "Add File" button and upload the file that you want to use for this tutorial. Step 6 In the next step, you will need to navigate to the template that you want to edit and click on the "Edit" button. Step 7 Use the Edit feature to modify your template, and save it when you have finished. Step 8 Go to the "Sources" tab, and you will see the HTML source code that you have just created. Step 9 If you want to use your template for
