A+ Folder Locker Cracked 2022 Latest Version is a lightweight application whose purpose is to help you create secure vaults where you can add sensitive files and folders so other users cannot gain access to them. In addition, you can mask and hide data by embedding it into photos. Create a new locker The tool gives you the possibility to generate lockers by providing information about the name, location and size, as well as adding it into a predefined category (Personal or Work). What's more, you can pick the compression level (high, medium, low) and encrypt the content stored within the locker using different algorithms, such as 3DES, Blowfish, Cast128, Serpent, Tea, Twofish, and Ice. You may protect the files and folders by setting up passwords based on text or pattern and enable the anti-hacking module that helps you automatically destruct the locker or disable the password login in case the password is enter incorrectly for a certain number of times. What's more, the tool is able to automatically lock the vault after a custom number of minutes of keyboard and mouse inactivity. Encrypt files and folders You can make use of the program's encryption capabilities and secure your private files and folders. The items can be dragged and dropped directly in the main panel, and you are allowed to select the encryption algorithm and set up a password. Decrypting data can be done via the utility's interface. Data concealer, password wallet and file shredder A+ Folder Locker Torrent Download offers you the option to hide sensitive information in images and apply an encryption algorithm, keep track of all your passwords in a wallet, and shred files from your computer. KeyMacro is an easy-to-use utility that lets you automatically paste your clipboard contents into a pre-defined text or an email message, a webpage, a MS Word document, an image, a PDF, a PowerPoint presentation, a table, a chart, or any other file. KEYMACRO Features: This software enables you to encrypt your clipboard by simply pressing the 'Generate Key' button. As a result, the contents of your clipboard become secret and safe. When you type a message, you can see how each key stroke is represented on the screen. This way you can be sure about the correctness of your message. Just by pressing the 'Encrypt/Decrypt' button, the clipboard contents will be encrypted and decrypted. You can optionally add any path to the file or a link to a website. KeyMacro runs in stealth mode so that it's possible to run it in the background without users seeing it. In the Info pane, you can set the text of the message, the file path, and a password. Once you start typing, the clipboard will be hidden and the information on the clipboard will be encrypted. The last encrypted text will be added as a message.
