Here is the code i am using to connect to the database, var stmt = conn.createStatement(); var sql = "SELECT * FROM MyTable WHERE ID = 1"; var reader = stmt.ExecuteReader(CommandBehavior.SingleRow); I have to run this

code in emulator for local database and in web server for remote database. I am using mysql database in both cases. I read something in stackoverflow that Local connection is emulated through web server i.e we can not connect to it. Is it true? I need to connect to the remote database directly. I have read that it has sql connect but don't know how to get that connection, I have tried to use the below code also
