

Bimoid Server Crack+ With Full Keygen Free [32|64bit] (Final 2022)

Bimoid Server Crack is a complete instant messaging software package for your local area network. Your users can now chat with you by using any modern instant messaging software such as Microsoft Windows Live Messenger or the free AOL instant messenger client. The Bimoid server is a system service which on installation, will be ready to accept connections from all users of your network and will allow them to communicate each other using Bimoid messenger. When the user of the client install the

Bimoid server application from the CD-ROM or through Internet, the Bimoid server administrative utility is automatically registered and added to the client's buddy list. The chat history between users is automatically saved into a local database which can be accessed by all users of the Bimoid server. All messages of the users are collected by the program and automatically delivered to the administrator. The administrator can view all messages of all users and reply to them. This is the main advantage of the Bimoid server over ordinary chat clients. Each user has a separate chat history which allows the administrator to do much with this information. The Bimoid server allows also file transfer between users, so it is possible to share data between the users of your local area network. The users of the application can start a voice or video call between each other. The Bimoid server was written for any modern operating system, so it works with Windows 95/98/Me/NT/2000/2003. The application runs under Microsoft Windows NT, 2000 or XP. The application can be also run under Linux. The files of the Bimoid application are not dependent on the operating system of the server and can be easily installed on another one. The installation of the application does not require additional configurations of any software. The only requirement of the network administrator is to set up a user account for the Bimoid server application in the domain. This is necessary for the network administrator to enable file transfers between the users of the network. Bimoid server Features: Network administration utility — this program allows the administrator to control all the activity of Bimoid server. The administrator can configure Bimoid server's parameters, adjust the activity of the server and view statistics of the application. Bimoid administrator utility — this utility allows the administrator to manage all users of the server, view chat messages, change buddy list, view the chat history, view media files, change account settings and so on. XML-RPC server — it allows developers to create their
