Category:Android (operating system) firmwareQ: Why are the "Clear Votes" buttons greyed out? Possible Duplicate: Why is my "vote down" button greyed out? On Ask Different it appears that this is a known issue: Image Source In addition, on the Apple Dev portal: I'm just not able to access these buttons. It's not that I don't want to, it's just that clicking on them (for the normal down-vote) does absolutely nothing. It only seems to have happened on this user profile page. Is this perhaps something that's cached on your own profile page and not actually part of the actual feature? The use case is still that users can choose to down-vote, and it's not as though it has a negative value. A: It's only greyed out when you have 2000 reputation, but on my mac, the buttons were greyed out when I had close to 2000. What did work was the "vote up" and "vote down" link. See here: Hello all, recently there was an update that changed the database by application vendor name. After the update I noticed that my role "Applications" is not showing "back to the previous" button (as in the case with everything else) -- it takes me to every apps related display on the home page, and I always have to scroll to find the app I'm looking for. After looking for the button in about 1 hour I found out that the link "back to previous applications" was moved from the "applications" tab to the "Roles" tab. I did the "configure application roles" again, and found the button, but it changes the default "switch to administration" instead of "switch to applications." What I think is happening is that this newly generated

database doesn't have the app name that belongs to me, and so it does a switch to the administration page. Is this the expected behavior? The other thing that I don't understand is why in previous builds the "configure application roles" made the link 3e33713323
