AutoCAD is owned by Autodesk, Inc., which was founded by Paul G. Schertz in 1959. The current owners include Hitachi, Sanyo, Toshiba, and American Express. The history of AutoCAD can be traced back to 1968 when Paul G. Schertz founded a company called Small Systems, Inc. (SSI) for the purpose of developing a graphics program for the Burroughs 6000 computers. The name of the program was Displaywriter. In 1970, SSI entered into an agreement with Digital Equipment Corporation, who licensed the Displaywriter program for use in their own computers. Displaywriter was subsequently renamed the Graphic Systems Office (GSO). The GSO software was composed of three programs, each of which was responsible for one of the operations required to produce a drawing in the form of a print. The first program was the Generate program, which produced line-style drawings and was responsible for establishing the drawing, producing text, and maintaining consistent scales. The second program was the

Drafting program, which contained the text editor and the 'pencil' tool and performed the editing and drawing of features and objects in the drawing. The final program was the Viewer program, which displayed the results of the other two programs on an output device, such as a CRT. In October 1971, the GSO was officially released as the Graphic Systems Office (GSO) for use on Digital Equipment Corporation computers, including the VAX, the PDP-7, and the PDP-11. By December 1971, the GSO was available for use on Digital's DEC Alpha microcomputer and it was able to run concurrently with the VAX on the same machine. Since the GSO was dependent on a DEC Alpha microcomputer, it could not be expected to perform well for the VAX or PDP-7. From 1975 to 1976, Paul G. Schertz, the founder of the company, traveled to Taiwan to develop a microcomputer called the SDS 940. It was intended to provide the software and microprocessors for the GSO, while being developed simultaneously on the VAX platform. However, these plans were not successful and the SDS 940 was not released. Instead, Paul G. Schertz left SSI and founded his own company, called AutoCAD, Inc., in early 1977, to develop the software for the SDS 940 and also to produce AutoCAD for the

Several scientific and engineering applications are available for Windows, such as AcuCAD. AutoCAD Free Download Map 3D is a graphing, mapping, and modeling software product available on the Windows Desktop. AutoCAD LT is the production-ready version of AutoCAD. It was introduced in February 2007 with full support for vector and raster data and new features. AutoCAD LT 2020 is a completely new version of AutoCAD LT and includes support for Surface Tablets, AutoCAD LT is part of the Autodesk Add-Ons bundle for Surface. AutoCAD Map 3D is a graphing, mapping, and modeling software product available on the Apple Macintosh and iOS platforms. Aki is a development platform for building 3D applications for Autodesk software. AutoCAD Architecture is a service and software solution specifically for Architectural, Engineering, Construction, and Landscape Architecture professionals. It is designed to meet the technical requirements of these professionals and provide a seamless workflow from design to documentation. It provides a comprehensive suite of features such as 2D, 3D, parametric and non-parametric drawing tools, workflows, parametric surfaces, special objects, site modeling tools, plans, elevations, and drawings. AutoCAD Civil 3D is a fully-featured 3D modeling and design software. It supports the complete range of civil engineering modeling applications including infrastructure, building, and mining engineering. AutoCAD Electrical is a software product used by electrical, electronic, and lighting designers and engineers in the electrical, electronic, and mechanical industries. AutoCAD Electrical 2020 was introduced with full support for vector and raster data and new features. AutoCAD Electrical is part of the Autodesk Add-Ons bundle for Surface. AutoCAD Exchange is a service that allows AutoCAD and other AutoDesk software to be used by non-registered end users as a part of the AutoDesk product line of software. AutoCAD Exchange 360 is a service that allows AutoCAD and other AutoDesk software to be used by non-registered end users as a part of the AutoDesk product line of software. AutoCAD Exchange Connect is a service that allows AutoCAD and other AutoDesk software to be used by non-registered end users as a part of the AutoDesk product line of software. Precipitation impact on the process performance and the emission characteristics of municipal solid waste incinerator fly ash. Municipal solid waste incinerator (MSWI) fly ash is a mixture of hazardous materials with high content of heavy metals (HM), which may pose a great risk to ecological environment if disposed improperly. This study investigated the effect of HM-precipitation on the process performance and the emission characteristics of MSWI fly ash in a laboratory experiment. The results showed that HM precipitation had no significant effect on the temperature, pH, chemical oxygen demand (COD), and chloride (Cl⁻) in MSWI fly ash at the HM-precipitation condition of 50% (m/m), and HM-precipitation could reduce the acidity of the MSWI fly ash solution at the HM-precipitation condition of 75% (m/m). HM-precipitation had no significant effect on the COD of the MSWI fly ash solution under the HM-precipitation condition of 50% (m/m), but it could reduce the COD of the MSWI fly ash solution under the HM-precipitation condition of 75% (m/m). HM-precipitation had no significant effect on the average emission concentration and pH values of the MSWI fly ash solution under the HM-precipitation conditions of 50% (m/m) and 75% (m/m), but it could increase the average emission concentration of Cl⁻. Late Saturday afternoon, the Associated Press broke the news that the Baylor football team would face immediate investigation from the NCAA. The news seems a bit premature given the fact that the investigation would likely last at least several weeks, the Big XII could have already been briefed on the matter, and the investigation could lead to no concrete conclusions given the highly confidential nature of the process. Yet, the moment we had all been awaiting came and the Baylor Bears took the field for their regular season finale against Texas Tech at AT&T Stadium in Arlington, Texas.
