.NET AutoCAD 2012 supports AutoLISP,.NET and Visual LISP (VLISP) programming environments that are embedded within AutoCAD. This makes it possible to automate AutoCAD from a .NET environment. This in turn makes it possible to access and manipulate data that was previously only accessible using VLISP. In 2010, the Visual Studio release of .NET was updated to include a drawing development tool called RivaTuner. RivaTuner enables AutoCAD programmers to debug and control AutoCAD drawings from within the .NET environment. VB.NET, a programming language derived from Visual Basic, is a framework that can be used to program AutoCAD objects and features. In 2013, it was announced that a C# and Visual Studio developer-focused update, called C# for AutoCAD, would be added to Autodesk's lineup of developer tools, following the release of AutoCAD 2014. This allows .NET developers to program with AutoCAD objects and features from within Visual Studio. Architecture AutoCAD Architecture features the Architectural Document Standard (ADS). It allows for the import and export of Autodesk DWF files, and thus imports and exports 2D and 3D drawings in an interoperable manner. For any imported 2D or 3D DWF file, Autodesk Architecture has the option to change the look to one of six standard ADE options, or to create custom look. The DWF file format is very similar to the JPG file format, which, along with PDF, are commonly used for exchanging graphical information. Construction and transportation Autodesk Construction is used for the construction and engineering of buildings, bridges, roads, and many other architectural projects. Included in the product is a number of different construction tools, including blocks, coordination tools, and archetypes. Autodesk Construction also has utilities for transportation such as maps, regionators, and network analysis. Marine Autodesk Marine offers 2D and 3D design, modeling, and drafting tools for vessels and watercraft. Marine is a part of the Autodesk product group; however, it is not a desktop AutoCAD product. Autodesk Marine offers a mobile version of the software, on both iOS and Android operating systems. In 2013, Autodesk Marine and the University of New Brunswick collaborated on the development of a basic Autodesk 3D design tool called 5b5f913d15
