Cadalyst readers told us they wanted to create their own unique documents. Now you can share your drawings in creative ways, such as displaying a single drawing on multiple webpages or on mobile devices. (video: 1:12 min.) Change and manage their own preferences in AutoCAD from your desktop. Now you can access your AutoCAD settings, such as an indicator bar, from a browser tab or from your mobile device. (video: 1:07 min.) Tracing, Text, and Insertion: Fill in the blanks when you need to. You can trace objects from the web, mobile apps, or other applications. You can then insert, edit, move, and align those objects with just a few clicks. (video: 1:30 min.) Select objects intelligently, with new context-based selection tools. With intelligent selection, the objects you select often receive a new look, including different colors and a three-dimensional preview. You can also change how you select objects. (video: 1:41 min.) You can now cut, copy, and paste from multiple files at the same time. You can even paste without selecting first, so you can create and paste together in one move. (video: 1:44 min.) Simplify copy-and-paste operations. Copy and paste now happens in a single click, so you can make changes to many copies at once. (video: 1:42 min.) Highlight regions of multi-page drawings. Now you can select any page of your drawings, regardless of where it is in the document. (video: 1:16 min.) Add files and copy the content of webpages to a drawing. Import the web or PDF content of a page to your drawings directly, and easily copy it to your desktop. (video: 1:34 min.) Word and Excel import, edit, and export to PDF. Now you can bring documents in multiple formats into AutoCAD, including Word and Excel documents. (video: 1:47 min.) Connection and Layout: Analyze, install, and troubleshoot network connections. Add a new network connection, or activate and disconnect your current connection. Now you can troubleshoot any connection problems. (video: 1:42 min.)
