SPAMXrpt is a great spam reporting program that makes spam reporting fun, and easy. SPAMXrpt is a great spam reporting program that makes spam reporting fun, and easy. It allows you to

Sp@mX Crack

=================== Sp@mX is a software that trace and report spammers. You can view the tracking data of spam e-mail sent to anyone on the Internet. You can report the spammers to their ISPs, using Sp@mX's unique e-mail notification system. Sp@mX will also use its database to track spammers and record their IP addresses, so that you can analyze spam e-mail e-mails sent from the same IP. Sp@mX Features: =================== ● Spam Tracing Sp@mX will trace the spam e-mail which you have input (Please select spammers to be traced on the Sp@mX configuration screen). You can choose "spammers from all countries in the world" or a specific spam filtering address. ● Tracking Reports You can report the results of the tracking, including the sender's IP address, the contact addresses of your spammers, and the spam e-mail content, with a form. Then you can automatically send this report to the ISP or the spam filtering organization (SPF record will be recorded when you report spammers to ISPs). If you don't receive the tracking report from the ISP or filtering organization after 14 days, you can send a follow-up report, and continue to do this after 15 days. When your SpamX account is blocked, or you are required to follow-up to complete your SpamX account recovery, you can send your SpamX account details to the ISP or filtering organization. You can choose to follow up to 10 accounts at a time, or set a time to send follow-up reports. ● Reporting You can include the contents of the spam e-mail in your report. When you send a report to the ISP, or the spam filtering organization, Sp@mX's database will record the e-mail text in the report. Thus the ISP or filtering organization will have the same data as you do. ● Exclusion and Malware Reports You can report the spammers who sent you spam email. Then you can choose to exclude spammers who have been contacted about their spam. Or you can report the spam e-mails as malware reports. If you don't receive your SpamX account blocked e-mail from the ISP or filtering organization after 14 days, you can set up a e-mail address to which you will send follow-up reports. You can 09e8f5149f

Sp@mX Crack With Keygen

Sp@mX is a software that trace and report spammers. It is useful for managing your e-mail database and preventing spammers from abusing your e-mail addresses. Sp@mX runs on the Windows 98, ME, NT, 2000, XP, or 2003 platforms. If you use Gmail or Yahoo Mail, you can use Sp@mX to trace and report spammers! Sp@mX is a software that trace and report spammers. Sp@mX can find spam messages and trace to the e-mail account and address of the sending email server. Thus, if you are receiving more spam from the same address and server, SpamX can trace and report it for you. What's New in v1.5.0?: Sp@mX 1.5.0 is an update that allows you to receive and view scan reports from a host or relay server. Sp@mX 1.5.0 is an update that allows you to save a new scan report and/or attachment as an e-mail message. SpamX Features: * Stop Spam! * Stop Spam What's New in v1.0.0?: Sp@mX 1.0.0 is an update that adds some new features. Now you can easily save a new scan report and/or attachment as an e-mail message! The new Sp@mX 1.0.0 feature allows you to save a new scan report and/or attachment as an e-mail message. Use this new feature to create a sort of Spam Alert report that you can send to other users to help them stop spam! With this feature you can record what emails you get, how many, and what they are. Record the sender, the time and the size of the spam. It can also record spam that is sent from other e-mail addresses. If you get too many spam messages, have a really low user count, or both, SpamX can help you out by delivering a report of the spam to your e-mail account. This is similar to what you can do with mailing lists! You can receive an e-mail of spam messages that you might receive that others want you to see. Mail groups are a collection of people that share similar interests. For example, mailing lists are useful if you want to send money to a worthy cause

What's New in the Sp@mX?

Sp@mX is a free, spam reporting tool that is proven effective. SpamX sends a copy of each detected spam e-mail to a central spam reporting server, which uses automated software to trace and report the spammer. You will see a report of the spammer's personal information including the top e-mail service provider used to deliver the spam and other spam details including their IP, the URL of the web site they came from, and the name of their ISP. SpamX is the best tool for detecting and reporting spam that you have seen - it's truly unique! Most spam fighting software requires that you open each spam e-mail and identify spam yourself or your users. That is a huge task and a monumental waste of time. SpamX is the only tool that will automatically identify and report spam for you! Sp@mX installation is easy - it will work on most versions of Microsoft Windows. It should also work on all Linux, Unix, and Mac OS X computers. In fact, it will even work on dial up internet connections! Sp@mX is 100% free, and comes with no strings attached. Simply download it and install it, and you can start getting spam fighting benefits immediately! Sp@mX History: Sp@mX was developed to fight spam. In the process of developing Sp@mX, we would go out and collect actual spam to test against. Unfortunately, the amount of spam we would collect would be incredibly high - daily spam e-mail volumes of tens of thousands of messages. Today we are only dealing with a few thousands of spam messages per day, but we still have to do most of the testing and development work on that high volume of spam, which is almost impossible. Sp@mX was designed to solve that problem. Sp@mX is a unique spam fighting software tool that analyzes all of the spam that arrives at your e-mail address. It then uses online and offline data sources to trace the spam back to the spam sources, and then reports that data back to you in a user friendly report that you can print, email, or save to a text file. This way we can test a lot of spam, and you can easily eliminate it. Sp@mX has been running successfully on the Internet since mid 2000. We are excited to announce that we have written the tool that is providing the spam fighting power on Sp

System Requirements For Sp@mX:
