Key Features Convert and edit photos Basic RAW and DNG conversion and editing Create and edit PDF and SVG images Basic photo editing Basic retouching Basic vector drawing Basic color and spot removal Basic photo collage Basic photo filters The Top 10 Features to Instantly Download and Start Using Today Adobe Photoshop Elements is by far the best image editing software available. The images editing features alone are impressive and the fact that it's so easy to use is what makes it a top favorite among the general public. The link above is a download of Adobe Photoshop Elements. Photoshop Elements has been and still is the only image editing software that allows you to cut, remove, and replace objects from a picture. Most users take advantage of this feature to move logos, remove people, and change objects in a photo. Photoshop Elements is usually used to retouch a photo that's not as high quality as a professional studio is able to deliver. However, Photoshop Elements does allow you to remove skin defects, remove spots, and fix poor visibility with ease. Video If you want to create a professional looking video, Photoshop Elements is the only software you will need. It comes with powerful video features that allow you to create a professional video with ease and an HD quality video. If you want to learn how to create professional videos with Photoshop Elements, please check out this tutorial. The link above is a download of Adobe Photoshop Elements. Photoshop Elements has the best photo editing features, but it also has powerful video features. It has all the basic video features and it's usually just as easy to use as Photoshop. In the video above, Photoshop Elements is used to edit a normal video from a bad camcorder (you can see an example in the bottom row of the video). You can see that it's easy to edit and style a video in Photoshop Elements. Q: Is it possible to make only a part of an image (e.g. just two faces) transparent in an image map I have a map that I want to use as a background for a navigation menu and I have everything working correctly in IE, but in FF I can't get the area I want to make transparent to be completely transparent. In IE, you see the entire top div, but in FF you see the entire top div and part of the next section div. Here is the code that I have now (just one visible div in the example): A: Could also use the CSS filter property: #background { position: absolute; width: 400px; height: 500px; margin-top: 0px; margin-left: 0px; margin-right: 0px; margin-bottom: 0px; border: 1px solid #000000; } #background.show { display: inline-block; } #background img { filter: alpha(opacity=30); /\* IE \*/ -webkit-opacity: 0.3; /\* Chrome, Safari, Opera \*/ -moz-opacity: 0.3; /\* Mozilla \*/ opacity: 0.3; /\* CSS3 \*/ } Or if you don't want to repeat the background image and want to save bandwidth, you could use the PNG (transparency) format.

The Healing Brush is perfect for fixing small scratches, freckles, and other small imperfections. The Marquee tool allows you to make a selection of an area by clicking, dragging, or typing. This tool can be used to resize, crop or draw shapes in an image. The Quick Selection tool allows you to easily select an object by clicking on it or pressing a key on your keyboard, and then quickly deleting the unwanted surrounding areas. The Smudge tool enables you to easily blur an object, or hide or reveal a specific area. The Smudge Tool can be a great tool to create special effects. The Pen Tool can be used to draw basic shapes. It's great for creating text. To edit the appearance of text, select the text with the Text tool or the Type tool and then select Edit > Transform > Warp Text, or you can click the Edit > Transform > Text option from the menu, and it opens the same drop-down menu. Then you can click on the Text dialog box that opens and select the Warp Text option under the Type menu. A Type Tool can be used to create objects, such as letters and words, and to write notes, text and captions. To use the Type tool, select the text you want to edit, then click on Type > Create and, from the menu, choose the type of text you want to create. For example, if you want to create a headline or a captions, you might select the Type tool, click the Create icon in the toolbox, and choose from one of the heading-style option. Be careful not to create too many different styles if you don't know how to merge or group them, in other words, don't create too many different types of objects. To create a new object, select the Type tool, click the Create icon in the toolbox, and choose one of the object styles from the Object drop-down menu. To merge the objects you created, you can use the Clone Stamp tool. To use the Clone Stamp tool, select the object that you want to copy and use the Clone Stamp tool on the area that you want to copy. If the object gets out of alignment and is moved in the wrong direction, you can use the Free Transform tool. To use the Free Transform tool, select the object, and click the Free Transform icon in the toolbox or use the menu Edit > Transform > Free Transform. To rotate an object, you
