The main goal is to create a real-life football match experience, where every decision is taken for you by a computer. Unlike in previous titles, players have “more freedom” – and can even make decisions that contribute to on-ball actions. “The new simplified AI system allows you to focus more on the fun of creating new tactics and finding new ways to score,” said Sebastian Szymanski,

Creative Director of EA SPORTS FIFA. “You can also go deep into the playbook of your favorite teams and learn what plays each team executes best when in certain situations.” The new setup allows for a totally new level of exploration and customization, as every scenario is new and there is always something to learn. You can also score goals in ways that were never before possible. For example, depending on the move of your teammates and your opponents, you can score a goal by using “scrapping” – where you trick your opponent into blocking the ball and it goes out of play. “You can change your formation and your tactics based on the situation. For example, if you are outnumbered, you can go for a 2-3-5 formation, which could change the outcome of the match,” said Szymanski. One thing that hasn’t changed, however, is that all decisions, apart from “pure” tactics, are ultimately determined by the

squad situation. Szymanski: “The most important thing is for the player to be able to play his natural game, no matter what tactics your opponent likes to use. A lot of decisions are now naturally reflected in how your tactics will play out.” The final goal of the HyperMotion technology is to personalize every aspect of gameplay. For example, you can take on FIFA 22’s new “Play Control” to play what feels like a real match. “If you like playing with a touch screen, you can change to the touch screen with the X button. Then you can go to ‘Free Kick,’ and follow it with your foot, just like in a real match,” said Szymanski. Another new feature added to FIFA 22 is the “Standard Play” mode, which is the new main mode for soccer games. The Standard Play experience has been extended, with new player intelligence, new graphics, new playbook and tactics, a new multi-player mode – Completemode

incorporated them into our game, making FIFA truly a game for real football fans. How FIFA is like real football As a football fan, you know there's nothing more important than the ball and the players. But only FIFA can make you feel like you are really part of the action. This is because you control every move in the game. You control exactly how the ball moves when you pass it, where your players dribble, and where you shoot. These actions are all tied to specific button presses, and the difference between when you press a button correctly and when you don't will really be reflected in the on-screen player actions.

Passing: 1 - Controls passing 2 - Leads teammate 3 - Leads teammate in the right direction 4 - Quick Shot 5 - Quick Shot with direction 6 - Chip 7 - Chipped pass to a teammate with direction 9 - Uncontrolled pass

The series has gone on to focus on many other sports including ice hockey, basketball, and Australian rules football. Currently in its fifteenth installment, FIFA 17 will be released on November 17, 2016. A unique blend of real-world action, signature gameplay, and premium in-game features, FIFA provides players with the opportunity to lead the next generation of sports video game champions as they compete on the pitch and in-depth career mode. The series has been awarded as the "Sports Game of the Year" by over 12 Game Critics'

Awards since its release. In November 2013, Electronic Arts announced the acquisition of EA SPORTS for \$2.8 billion. The acquisition of EA SPORTS by Electronic Arts continues the growth of the Company's sports franchise business, which is anchored by EA SPORTS FIFA, EA SPORTS NHL, EA SPORTS UFC, and EA SPORTS COMBINATION. The games in the series have combined sales of over 260 million units, and have received over 70 Game of the Year awards. Today EA SPORTS has grown to become one of the world's largest sports games franchise companies with offices in the US, Canada, UK, Germany, Sweden, Denmark, Finland, Japan, China, and India. FIFA is currently available for free download on various platforms through

digital distribution platforms, and is available as a paid game for all major video game consoles, and also as a non-subscription game for PC and mobile platforms. What is FIFA? Nostalgia for sports like the FIFA series is a powerful and sometimes beautiful thing, but as a student of the video game industry I never took it for granted. As someone who has lived through the evolution of the industry, I've had a front row seat to witness the various debuts and excesses of the past and present. It also goes without saying that I miss the simple joys of playing a video game that you could pick up and play for hours on end, away from your friends, as you reminisce on the experiences you've had in the real world. While the industry has never been

healthier, or in a better place than it is today, videogames are now in the process of a growing crisis that
