The app allows you to write documents or texts directly on your computer. So if you want to write fast and effectively, you should go for something like a text editor. Keyboard Shortcuts: - A standard keyboard shortcut to create a new document is [Shift]+[c]. To edit the document you have just created, choose the appropriate text editor (Wordpad) and change it to the corresponding file. This is a common feature of almost any text editor. - To insert a new code line just type [Cmd]+[L] and add a new line for your code, and it will be inserted automatically. In the following screenshot, it will be interesting to note that there are 'active' or 'blue' lines that are being used at the moment and the one in the middle of the bottom of the editor

---

is 'inactive': How it works: - A key combination or hotkey can be selected in the Options. If it has been selected as a default shortcut, it
