(#2) Bill McGarvey: 3:21.: The Center for Healthy Heart and Language is a program of the University of Miami's Health System. How to Keep a Planet Earth Close on Orbiting Metals For over 100 years humans have studied the Earth from space. But, as we have figured out more about space, Earth has gotten harder and harder to reach for scientists studying our home planet. And now an international team has worked together to develop a plan to get back in touch with Earth using orbiting metals. Wired recently published an article about the team, which is called THE-A (The Access to Earth and Space), and how they plan to use materials traveling around Earth to maintain contact with our home planet.

H1Z1 : Learn H1Z1 with us! Hi players, It's important to play with others and get some teamwork practice. We've been testing out the Cooperative Multiplayer component in Alpha. Please try it out and provide feedback. To make the game a bit more fun, we've made a few differences to the HUD and basic gameplay of the game. Players can now monitor their allies, track their health and jump in/out of a game directly from the main menu. You can also enter your H1Z1 free avatar name during gameplay so you can track your activity in the Zone. Remember, you have to be at least Level 12 to play in the Zone. This is a beta version of H1Z1 and may have some issues. Let us know what you think! We plan to update the game every Wednesday.

Disparities in the number of productive NRTI (\*\*g\*\*) and PI (\*\*h\*\*) mutations. In boxes, averages and 95% confidence intervals for all iterations shown. Points in the box plots depict the final median value of the respective figure of merit. Individual runs are shown as points. Mutation profile evaluations were performed on models with the final consensus sequence from the model with the best score, Figure S8: Overlap of WT and MPN reference sequences with representative sequences from non-productive therapy simulations. The WT and MPN reference sequences, with the corresponding CRF31\_CPZ resistance mutations (\*\*a\*\*), overlap with representative sequences from non-productive therapy simulations with the corresponding AMPA resistance mutations (\*\*b\*\*), and overlap with representative sequences from non-productive therapy simulations with
