Getting Started With Photoshop To get started with Photoshop, you don't need an expert tutorial. You just need a few steps to get comfortable with the interface and tools. Here's the basics: 1. To use Photoshop, open your browser and navigate to [Photoshop.com](https://www.adobe.com/photshop). If you've already downloaded

the software, launch it. 2. If you're a beginner, make sure you have the latest version of Photoshop. Don't worry about the cost. You can always upgrade later. 3. Download and open the software. On your first launch, you'll see a welcome screen that guides you through the basics. You may see an error, though. If this happens, make sure you're on the latest version of Photoshop, and close out the program. 4. Click on the program, go to File, and then locate Load File. (You'll get an

error if you don't have a file to load.) 5. If the program is not fully set up, you may see a welcome screen with some errors. If this is the case, click on OK. You should now see a blank window. You'll see an introductory screen with a blinking cursor and the words Photoshop CS6 ready to use. Click on Continue. Steps 1 through 4, as well as the basics of the editing process, are contained in the tutorial. So, follow the basic steps to get started with Photoshop.

are some brush effects that

require a plug-in. These

include the Glow, Emboss,
