To listen to music in the Merkaba A. To look at the Monuments M. To know the Masculine Principle I have just come back from vacation. During the week the weather was such a rainy summer that I decided to spend the time in the USA. What a difference! I was in the USA and they had the same weather. The rain came at such a rate that I could not enjoy the sights that were show to me. The drivers were just like a herd of bee-stings going towards and fro. It was very strange. They say that on this trip it is going to be sunny and warm. I am ready. I have been going through the times of the Masculine Principle and they have not been easy. It is all very intriguing. It started with Ego. Let's call it Ego-1. I came to the conclusion that I had it and that it was not going to be easy to get rid of it. If you want to know how it started, you will have to read the previous newsletters. But every time I would

Duplicate: How to get the enum value by it's  
index in.NET? Suppose I have an enum like this:  
public enum MyEnum { [EnumMember(Value =  
"name\_a")] Name\_A, [EnumMember(Value =  
"name\_b")] Name\_B, [EnumMember(Value =  
"name\_c")] Name\_C, } I can write something  
like this to get the value by its name: public  
static MyEnum GetEnumByName(string name) {  
var members = (from x in  
Enum.GetValues(typeof(MyEnum)) select  
(MyEnum)Enum.Parse(typeof(MyEnum),  
x.ToString())) .Where(x => x.ToString() ==  
name).FirstOrDefault(); return members!= null?

---

members : null; } Is there any way to write a function which takes as a parameter an enum's index and returns the value (in this case Name\_A)? A: Since you'll use this only internally, you'll want a form of variadic function. For example: `internal static T GetEnumByIndex(this T[] enumValues, int index) { return enumValues[index]; }` Then: `var en`
