* Photo retouching (Chapter 17) * Making an album (Chapter 18) * Photographic composition (Chapter 19) ## Organizing and Arranging Your Photos You need to keep your photos separated and in order as you work. If you put them in a loose photo album and then try to develop your shots in the order that they're in that album, you'll quickly find yourself looking at the very beginning of your project and having a hard time finding a particular photo. Here are some places you can keep your photos: * On a computer hard drive * On a CD or DVD * In a photo box * In a photo album * In a file folder You can label each of these file folders or boxes with a meaningful title or simple note that tells you the contents of the folder. I often use a simple star or number system to designate the order in which I work through my images. I can easily recall exactly what the sequence is for each of my projects by using a simple system, such as labeling each box with a number or star. If you put your box numbers in your e-mail signature or on a sticky note, they're there with you for the rest of your life. If you can't find a box or folder for a particular photo, you can simply drag the photo file into the appropriate spot in your application or folder. Organizing your image files in a folder system helps you to easily locate any particular shot that you want to work on by using the Find feature. You can also use the Tag feature to assign specific labels to your photos. ## Running Photoshop Photoshop is a large application with lots of features, so it would be easy to take a lot of time to explore the many possible functions. In reality, you won't be using all of them in any particular project. * You can launch Photoshop from your hard drive, DVD, or CD by clicking the Photoshop icon or the Photoshop application name from the Start menu. * If you just open the application from your computer, it opens in the Adobe Photoshop window. You can change this to open the image window by choosing File⇒Preferences and then clicking the Window tab and choosing the Window Style drop-down menu to select the type of window you want. You can also specify that Photoshop should be the default application to launch your programs with by selecting Default for All my Programs from the Start menu.

Modified frontoparietal fascia flap for large scalp defects. To present our experience of using the modified frontoparietal fascia flap for the reconstruction of large scalp defects. Between August 2003 and April 2010, 61 patients with large scalp defects were treated with modified frontoparietal fascia flaps. There were 19 male and 42 female patients, aged from 14 to 63 years (mean, 40.9 years). The cause of defects was tumor excision (35 cases), burn (8 cases), trauma (9 cases), and excision of medulloblastoma (3 cases). All cases of tumor excision required anterior and posterior scalp flap, whereas burn wounds required a wide buttress flap for coverage. Trauma wounds involved scalp (8), scalp and neck (5), and scalp and chest (2). To cover exposed bone, the cut edges were sutured with individual wound sutures, buried under scalp flaps or buttress flaps. The skin island in the flap ranged in size from 12.5 × 8.5 cm to 25 × 20 cm. The overall survival rate of the frontoparietal fascia flap was 98.4%. The mean time to hair growth was 8 to 12 months. No obvious sensory disturbance was observed in the donor area, although discomfort was reported in 7 patients during healing. The modified frontoparietal fascia flap is a useful option for the reconstruction of large scalp defects, especially for scalp and neck reconstruction and some large chest wounds. Furthermore, the skin island in the flap is easy to harvest and adapt to scalp defects.French and German armies begin withdrawal from Mali, but Mali and U.N. forces are to give critical support By Oliver Holmes, Senior Africa Analyst at IHS Jane's June 11 - The French and German armies began withdrawing from the country on Saturday, 3 July, as part of the peace process agreed between the Malian government and the coup-imposed regime in the north. However, the peace process, launched in March, remains in doubt. The British Prime Minister, David Cameron, announced shortly before the start of the withdrawals that it was the first step towards "an end to conflict" in Mali. The French and German forces were involved in actions against the Islamic extremists of the Movement for Oneness and Jihad in West Africa (MUJAO) and the Al-Qaeda affiliate al-Qaeda in the Islamic Maghreb (AQIM).
