DrumCore Demo is a tool for songwriters. It offers an extensive search and audition for the best beats to play. It includes a comprehensive set of drum kits and groove sets. This tool is an all-in-one solution, offering all the elements you need to start composing songs. The "DrumCore" tool offers up to 2GB of content, including the legendary SMF percussion library by MidiHappens. It can be used as a standalone tool or as a drop in integration for all major groove editor software. The DrumCore Demo provides a full-featured GrooveSet Editor (including the SMF percussion library), a MIDI-Standard Drum Instrument, and offers a full-featured content search (including many GrooveSets). You can also audition and export the songs created (44.1, 48kHz/16 or 24 bit WAV, AIFF, REX2). Please note: - This product is

limited to 2GB of content - Content is in WAV format only New GrooveSets available on MidiHappens The new groovesets are grouped by GrooveStyle, and each GrooveStyle contains up to 10 new groovesets. With each order you also get the benefit of a 30% discount. The content is exported (only available in 44.1kHz/16bit and 48kHz/16bit - AIFF not available as the output format) in two formats: - VST2 - MIDI files The MIDI drum instruments in DrumCore Demo only work with the DrumCore Pro or DrumCore Studio versions. DrumCore Live will work with DrumCore Demo and export MIDI and VST2 files. The MIDI files can be exported in audio formats (44.1, 48kHz/16bit, AIFF).
