The best apps for the Mac to make you a happier engineer Here are our favorite apps to make you more productive and have a happier day on the job.Q: How to send message to my own contact via GCM The documentation says that I can send message to my device by sending to the messaging registration ID. However, I don't know what the registration ID is, especially the server side. Is there anyway to use my own contact's registration ID? Thanks. A: A registration ID can be found in the console under "APNS" or by navigating to The server side documentation is also quite good, but it requires registration. The documentation states: If it is your server who is sending the messages, your server should send the registration token as well. If it is your client that is sending the message, you should get the token from the incoming HTTP request to the GCM endpoint. To
