App Launcher Vista Gadget Crack [Latest]

App Launcher is a gadget that will enable you to keep your favorite applications under the same roof. It comes in the form of a gadget and will work on any version of Windows starting Vista. User Interface: App Launcher comes with a nice design. It is made possible thanks to the cool multi-color theme with black accents. The Layout section offers several options to configure it to your liking. Right-click anywhere on the application title bar and choose Layout. Now that we are in the Layout section, we can access the General tab to choose the icon size (you can change it to large if you like). There are three available selections, tiny, small and large. The sorting order is also easily changed in the General tab. Pick from the order of Use, Action, Start Menu and My Computer. A launcher also supports drag'n'drop, however this option should be used sparingly. Imagine that you add a folder shortcut to the launcher and it is later added to the opening folder of that application. Now it is a drag'n'drop source and not the shortcut. Of course, it can be restored to its original value by resetting the settings of the gadget. To add new applications to the launcher, simply drag'n'drop the executable file to it. You will be asked to confirm the action, before a few seconds later the application will be added to the launcher. The Change icon to shortcut button can be used to replace an existing icon with a shortcut one. There are several options available to set. You can change a shortcut to go to the Start menu, My Computer or Control Panel. Again, we can change the icon displayed under the shortcut and even add our own. We can also add a generic page to the launcher with information regarding the shortcut. For instance, if we click on the shortcut in the launcher, information regarding the application will appear below it. Settings: The settings section offers different options to manage the gadget. You can change the icon size, background color, sort order and even manage the positions of the shortcuts. Icons can be removed, reshuffled and even replaced. Click on the Recycle Bin icon to restore the original setting. You can also add additional information to the gadget by clicking on the Links button. We can add new shortcut links for folder shortcuts and Internet Explorer favorites. You can also click on the Misc button and manage the actions that occur when you drag'n'drop files and shortcuts to them. Changes: App b7e8fd5c8
