The importance of Alu sequences is indicated by their large number (800,000 copies), their abundance (1-10% of all DNA), and by their frequent association with disease loci. Alu is a type of SINE (short interspersed nucleotide elements) element, and the mechanism by which Alu-derived sequences are inserted into mammalian genomes is of interest. In addition, there are close homologues of Alu, which have been integrated into the genomes of primates and possibly other organisms. Because of these sequence homologies, it is possible to develop PCR-based, non-isotopic assays for

California Court of Appeals. Second Appellate District, Division One. January 27, 1937. Russell H. Vowles and John J. Coleman for Appellant. H. L. V. Ryder, in pro. per., for Respondent. White, J. This is an appeal from a judgment in an action for a breach of a real estate contract wherein the trial court found, among other things, that the defendants performed their part of the contract, but the plaintiff did not, and awarded the plaintiff the sum of \$1194.50, with interest, and judgment for said sum with interest at the rate of seven per cent per annum, together with costs and disbursements. The defendant S. P. Kelly, on the 13th day of April, 1936, orally agreed to sell and deliver to the plaintiff an apartment house in Oakland, California, for the sum of \$4,000, payable in installments as follows: \$100 as a deposit on the day of the sale, with the balance of the purchase price to be paid in five equal installments, one-half to be paid on the third, fourth and fifth days following the sale, the other half to be paid on the tenth day following, and that said sale would be made for cash or on the following terms: "If buyer shall pay 1/2 of the cash or on the third day, the remaining 1/2 to be paid on the tenth day. Buyer to make all payments by cash or check. The seller shall keep his books so that the latter's name will appear on said books as the sole owner." On the 1cdb36666d
