does not integrate with any other extension. - No action is taken from you and no action is taken from the browser. - It is compatible with Opera. An ad-blocking extension has been developed for Opera as it tracks browsing activities that can be used to track a user's web habits. The extension is created using user agent string analysis of tracking scripts within web pages. The user's browsing can be tracked through the use of pixel tags and beacons within the web pages that the extension monitors. Of the elements that are included, the extension's database is comprised of several types of trackers that include: 1. Google AdSense - Advertisements are shown through Google ads on the webpages of the same destination. These are tracked by the extension, and the number of clicks, location, time, frequency, among other various events, are tracked b7e8fdf5c8
