Filtering by Category Byline Although Kenneth Feinberg has handled a number of high-profile cases during the last decade, the giant accounting firm Enron has loomed larger than most in the public's mind. With the help of a legion of specialists—investigative journalist Sabrina Tavernise among them—the New York Times has been doggedly pursuing the story of how the shell-shocked company handled its accounting, accounting processes and ethics. In a move calculated to heighten public interest in its story, the Times on December 12th published the SEC's 2003 report into what went wrong at Enron, which was released in July, but no one had previously known about it. The report, given to us by a source inside the agency, was kept secret by the SEC, which later said it had decided to wait until more than 10 years after the fact before issuing it publicly. It was the only such withheld report in the agency's entire history. The report's release caps the biggest political and regulatory insider story in America since 9/11. In the years after Enron's meteoric rise and fall, no scandal has held as much influence over the management of financial reform. All of them involve Enron, making Feinberg the first person with such a wide portfolio since the agreement to hand over Enron assets to its creditors that led to the creation of the bankruptcy court. But first he has to decide which Enron case to handle. The first, which would have made him one of the biggest names in the accounting industry, would have been the recovery of Enron's profits from 2001 to 2003, which federal bankruptcy investigators hope to claw back in order to repay investors. This case would have been a test of his expertise and judgment and his preference was clear: he wanted this one. He spent two days last week in telephone discussions with SEC Chairman Arthur Levitt, and on December 10th asked
