So what if you want to get a reward for any quality application that you pick? Well, you need to make it happen. The two greatest communities online - Windows and iPhone - happen to offer great opportunities to cash in on. What's more, the App Store is also benefiting the developers as they share what they're working on, and occasionally they even throw in a few freebies. The best part is that your application doesn't have to be available in these two markets! While the iPhone is a popular platform for creating applications, the Windows Phone and the Android phones are getting popular too. This means that more people are using their mobile devices to browse the stores or even download the applications. It's not hard to see why the Windows Store is getting popular. I mean – it's the Windows App Store. That's a pretty good marketing slogan, isn't it? You'll find the information below that will get you cracking on the development for mobile platforms. It's not hard to see why the Windows Store is getting popular. I mean – it's the Windows App Store. That's a pretty good marketing slogan, isn't it? So if you want to benefit from the mobile platforms, you need to make mobile applications for Windows, iPhone, Android, and Windows Phone. Let's look at the scenarios where mobile apps can be developed for a particular operating system. Windows The Windows operating system is the most popular platform in the world. You'll find that the Windows OS is used in almost every software and hardware b7e8fdf5c8
