I'm delighted to tell you that Octave is still alive and well, and still my favorite! In a nutshell, it's a free numerical computing software that can be used for scientific purposes, such as applied or pure research and engineering. It can also be used for creation of spreadsheets and presentations. It's powerful because it supports programming languages like Python, R, Matlab, etc. To be honest, I used Octave for quite a long time, but I couldn't justify using it in class anymore because of the steep learning curve. Now, I know better, so if you're looking for a light weight program that will give you all the power of your favorite software, you need Octave. I've compiled a few top features that make Octave a great choice for use in education and research. 1. Powerful features - all the power of your favorite software I'm going to start by saying, even though it's free, it's never been marketed as a glorified spreadsheet. Octave has features unlike anything I've ever seen. Let me give you an example. Let's say you want to calculate a simple logarithm function in Python. It's so simple but so elegant to write a function. log10(10**x) The result is the natural logarithm of 10. You can use it to calculate the rate of decay for a radioactive isotope, equation of state of solids or liquids, and so on.

(KGO) -- The new Coliseum City development in Oakland, California on the former Coliseum site will include three or four publicly owned football stadiums that are at least as large as Levi's Stadium, according to design documents obtained by ABC7 News.These drawings were included on a January presentation to the Oakland City Council and the Oakland-Alameda County Coliseum Authority.However, it's unclear exactly what plans Oracle and AEG, the owners of the San Francisco 49ers, have for the site.CBS-5 has learned plans already call for a city-owned football stadium, a stadium that could be publicly owned and could be privately owned, and even a privately owned baseball stadium. It is unclear which plan is closest to reality or in planning.Oracle's interest in the Coliseum City comes as the company plans to lease the current Oracle Arena in Oakland, which would include the publicly owned Bill Graham Oakland-Alameda County Coliseum Arena - which is not included in the developers' plans - next door to the new Oracle Arena.In downtown San Francisco, Oracle is developing two new 30,000-seat arenas, one of which will be located in The Piers, the rooftop at the Transamerica Pyramid.A city-owned football stadium could be part of a larger plan for an NFL stadium, according to the presentation. The stadium would be located on the site of the Coliseum, and could be privately or publicly owned, said a source with direct knowledge of the plans.According to the architectural drawings, the stadium would have 80 percent of the current Coliseum footprint. The stadium would be about a third the size of Levi's Stadium - it would be 54,000 seats compared to Levi's 68,000 seats.The architectural drawings call for a 20,000- to 25,000-seat baseball stadium

with some floor-to-ceiling glass, with the potential for adding 15,000 seats. The ball park could be publicly or privately owned.The drawings also call for a public plaza with 340,000 to 500,000
