[b]What is Roblox?[/b] [i]Roblox is a free online platform, which means that it is free to create games and play them. You are not required to register and can do everything, which helps to make it an extremely fun and friendly platform to play games on. If you do register, you gain access to your own “world”. This world is the main place in your games, and you control what happens there in the game itself. You can add friends, chat, and customize the gameplay. Roblox uses its own virtual currency, Robux, to pay for these activities and they can also be earned through free game play. As of February 2020, Robux is worth around \$300 million.[/i] [b]How does it work?[/b]

[i]Roblox is a collaborative platform that makes the construction of games, but also the experience of playing them, extremely enjoyable. You can make the design of your world or minecraft style level as you like, but if you want to be able to share it with other users, you will need to make a code. This code is where you actually make the game. Think of it as of a simple engine, but you can add whatever features you want. Some of the features you can add to your game might be motorized characters, weapons, powers, and traps. The main feature is actually how you can customize the gameplay itself. You are able to add game-play obstacles, such as the number of zombies, the environment in which you play, and the number of rounds of a game. There are many other features as well, all of which are completely customizable through the code. Also, even when you have finished the creation of your game, you are able to share it with other users. If you have a code that users like, it can be included in their own worlds. This provides you with a very unique experience of gaming, as you are not playing a game that only you made, but you are playing a game where other people help you and you help them.

Roblox also has a very social component, as you can chat, share play-times, and invite friends to join in the adventure. [i] [b]How does the game play?[/b] [i]The gameplay consists of creating a story, choosing what actors in that story do, then placing them into a 3D world. Actors can

**experiences with Roblox free robux please share with me! I've tried to get free robux using their own robux generator, adding robux to my wallet, downloading some premium packs, and saving my own robux. Note that I have a paid Ro. I want free Robux. It's difficult for me to believe that this is not possible. Yes, you can get free robux with Premium Packs on Roblox. You have to either get a new Roblox account with free robux or register a premium one with some robux and it's usually a lot of robux that's free, but most of the time you have to buy premium currency. I've tried doing this on Roblox by following all of the above methods, and I've already spent quite a bit of robux to get free robux. Also this isn't as easy as it seems. You can't just go into the download list and download free robux. It's impossible to do. Yes, you can get free robux with Premium Packs on Roblox.
